PROFILE

Product Designer with 10+ years simplifying complex problems into intuitive experiences. I specialise in regulated industries, with a focus on energy and sustainability over the last 4–5 years. I've worked with major brands and early-stage startups, designing consumer B2C and B2B products from strategy through launch.

Colleagues point to my ability to clarify complex technical challenges and translate ideas into practical, user-centric experiences. I thrive in collaborative teams, consistently being seen as a teammate people want to work with. I bring clarity, problem-solving, and strong user advocacy to every project.

RECENT

◆ Over the last 6 months, I've intentionally upskilled and rebuilt my portfolio using Claude. I've worked with AI tools to accelerate design thinking and prototyping, and I'm currently researching and building a climate-based experimental app. Throughout this period, I've balanced work exploration with being present for my family during maternity leave transition.

HIGHLIGHTS

◆ UX lead for vehicle-to-home energy management in the MyToyota app, translating complex EV and home energy systems into intuitive experiences. Partnered with senior stakeholders to strategise the overall EV driver experience, redesigning the Smart Charging journey and building alignment across product, engineering, and leadership on feature prioritisation.

◆ Designed the first B2C home energy management app for Shell Energy, influencing product and feature strategy from vision through to beta launch. The app was showcased at Berlin GreenTech Festival.

EXPERIENCE

Product Design Consultant (freelance) · GenSec Health

Oct 2025 – Jan 2026

- Approached by GenSec Health to provide fractional product design support where I helped to define the core app experience. This involved combining genetic and biometric health data into meaningful patient health narratives in a mobile and desktop app.

BEST AT

Simplifying Complex Systems: Translating technical challenges into intuitive, user-centric solutions across regulated industries

Cross-functional Collaboration: Building alignment between product, engineering, and stakeholders on high-stakes projects

Design Strategy & Discovery: Leading research-informed design from problem definition through validation

PROCESS / METHODOLOGY

User Research & Interviews | Usability Testing & Validation | Prototyping & Wireframing | Product Strategy & Discovery | Agile Frameworks | Stakeholder Communication | Service Design | Workshops

SKILLS

Figma | Mobile Design | Data Visualisation | Visual Design | Design Systems | Product Thinking | Information Architecture

PRODUCT DESIGNER | STRATEGIST | ENERGY & SUSTAINABILITY

2 / 3

<https://kmueller.co.uk> | kmuellerservices@gmail.com | 07548624491

GenSec Health ctd

- Worked with scientists and independent health clinics to translate complex medical data into accessible, actionable patient experiences through ideation, research, and prototyping.

Career pause — maternity leave

Oct 2024 – Oct 2025

Senior Product Designer (contract) · Toyota Connected

Apr 2024 – Oct 2024

- Led UX for vehicle-to-home energy management features across the MyToyota app (300k+ active users)
- Completely revamped the Smart Charging user journey – a complex feature integrating home charging and energy management – resulting in more intuitive interfaces and stronger user engagement through iterative testing and validation.
- Partnered with senior Toyota stakeholders to strategise the overall product direction and experience for EV drivers on the MyToyota app.
- Contributed to Toyota's design system by building and validating new data visualisation components for complex energy data.

Senior Product Designer (contract) · Shell Agile Hub

Jan 2022 – Oct 2023

- Pioneered a B2C home energy management app for Shell Energy, designed to help consumers understand and control their energy usage. Took over as Lead Designer mid-project, leading end-to-end UX research, UI design, and feature strategy with a focus on user engagement and incentivising smart energy behaviour. Delivered the product ready for national launch and showcased at GreenTech Festival.
- Led an important design sprint for Shell's portfolio company solar energy firm **sonnen** to design their first-ever dynamic pricing offering – a system that incentivises users to shift energy usage based on grid demand and pricing. Delivered proof-of-concept, testing approach, integration proposals, and comprehensive research and design pack to senior stakeholders.
- Designed and delivered a conference app for Shell's Agile Hub Bangalore, coordinating with senior stakeholders and across time zones as key point person to create an intuitive attendee experience.

SKILLS CTD

Accessibility (WCAG) | Claude Code | Claude Design | Adobe Suite
Familiar with HTML, CSS, JS, React | Familiar with Animation

TRAINING

Designing with AI Agents in Figma
Memorisely 2026
